

# Creating win-win opportunities for landowners and green energy

Earn an extra income from your land and support the journey to net zero

# Make the most of your land – with the green energy experts

**We work with landowners to unlock the potential of their land by developing solar farms and battery storage solutions.** Our projects and partnerships are at the heart of the drive to decarbonise electricity generation and create a carbon-neutral future for us all. When we lease your land, you'll earn a regular, long-term income, and we'll use the land to create greener, cleaner energy. You could even continue to farm your land whilst generating clean energy with one of our agrivoltaic solutions.

## Who is behind this initiative?

Our aim at Orrön Energy is to power the energy transition at scale and support the journey towards net zero. Our UK-based team is highly experienced in working with farmers and landowners in a way that is beneficial to everyone involved and that protects the character and biodiversity of the land and local area.

The team has proven success with projects across Europe, demonstrating that working in partnership with us can help you diversify and earn a regular income from leasing your land to renewable energy projects. Our expert team in the UK has over 60 years of experience in energy and renewable technology, so you're always in safe hands.

## Financially strong partner

Orrön Energy is one of the largest independent renewables companies in Sweden and part of the successful Lundin Group of companies. We're backed by the Lundin Family, an entrepreneurial family with a long history of growing successful companies within the natural resources sector. We're a long-term investor in renewable energy projects, with strong financial capacity to fund growth and are run by an experienced management team with a long-standing background in the energy sector.

your land email [development@orron.com](mailto:development@orron.com)**

## What's in it for you?

### **You'll get a regular, long-term income from your land**

If you have land that's not earning its keep, turn it into an income pipeline by using it to support renewable energy generation.

### **Support energy security and net zero**

Using your land to support the development of new green energy can help the UK work towards independent energy security. In addition, you'll help contribute to the UK's target of achieving net zero carbon emissions by 2050 – creating a cleaner, greener future for the next generation.

### **No financial risk to you**

There is zero financial spend on your part. Everything is fully funded by us. The ownership of your land is never in question – it is always 100% yours – we just lease it.

### **Improve biodiversity**

The nature-inclusive design of our solar farms and battery storage solutions maximises the positive impact on biodiversity. From bees and insects to native plants, solar farms can become thriving areas for nature.

### **Keep the sheep!**

Want to continue to farm the land? No problem. Our range of agrivoltaic solutions let you continue farming or grazing certain livestock within the solar farm.

## About us

Orrön Energy is one of the largest independent renewable companies in Sweden. We operate renewable assets in the Nordics and are aiming to grow our portfolio by developing new renewable energy projects in the Nordics, UK, France and Germany.

Sustainability is at the core of our business and we view strong community engagement and environmental protection as being essential to the success of our business. Orrön Energy's mission is to help drive the energy transition by producing and developing renewable energy in a safe and responsible manner, for a sustainable energy future.
